## Free or professional cloud?

With your data logger you automatically track temperature, humidity or CO<sub>2</sub> via the EasyLog Cloud. The available features depend on your account type.

### FREE

#### Free EasyLog Cloud

- Data storage limited to 45 days
- Reporting features
- Email alerts
- 1 logger & user per account
- No SMS/phone call alerts

#### → Free cloud setup guide

### RECOMMENDED

#### Professional Cloud

- Unlimited data storage
- Email alerts
- SMS/phone call alerts possible (with SMS credits)
- Multiple loggers, locations & users
- Central management & export

#### → Professional cloud setup guide

## Why switch to the professional cloud?

With the free cloud, your data disappears after just 45 days — which means you could be left without a history right when an inspection or audit happens, and you have to manually download and back up your data every time. With the professional cloud you keep all your data indefinitely, manage every logger from one central environment instead of a separate login per device, and you're always audit-ready. Request your upgrade today.

### Buy the professional cloud
